AGENDA OF THE LANDING PAGE

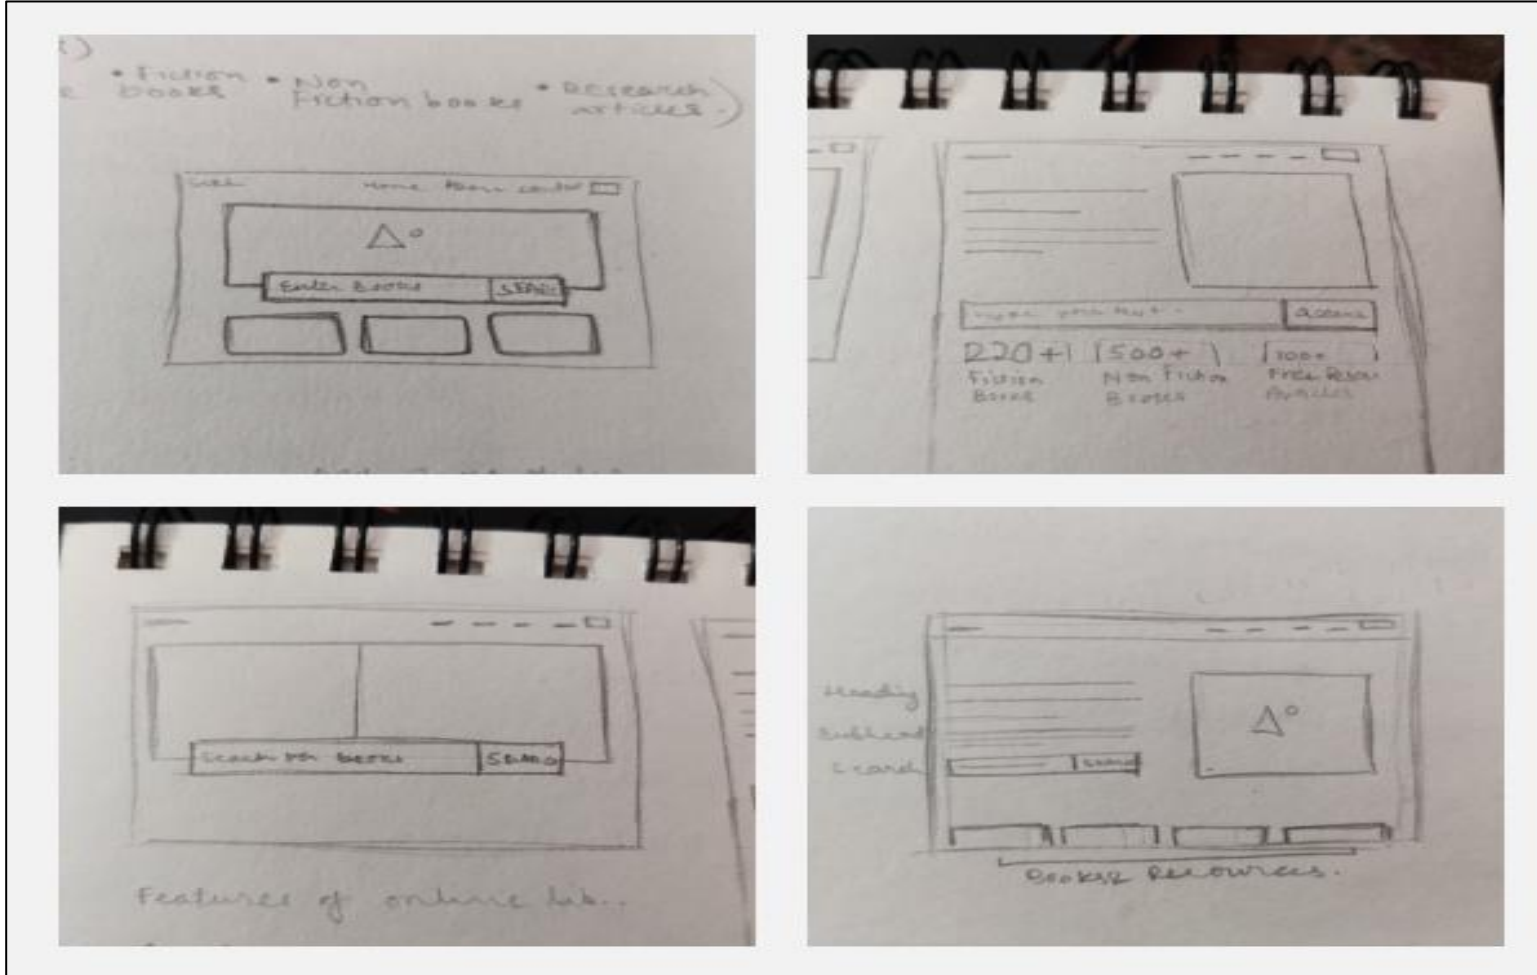

- 1. Creating Awareness:** Creating Awareness about the new platform.
- 2. Building Trust:** Presenting the website in a way that it comes out as **helpful, engaging, and reliable** for the users.
- 3. Conversion:** Get users to **Sign-up** once they find the website helpful and reliable.

RESEARCH AND COMPETITIVE ANALYSIS 🧐

Some key points from my observation were:

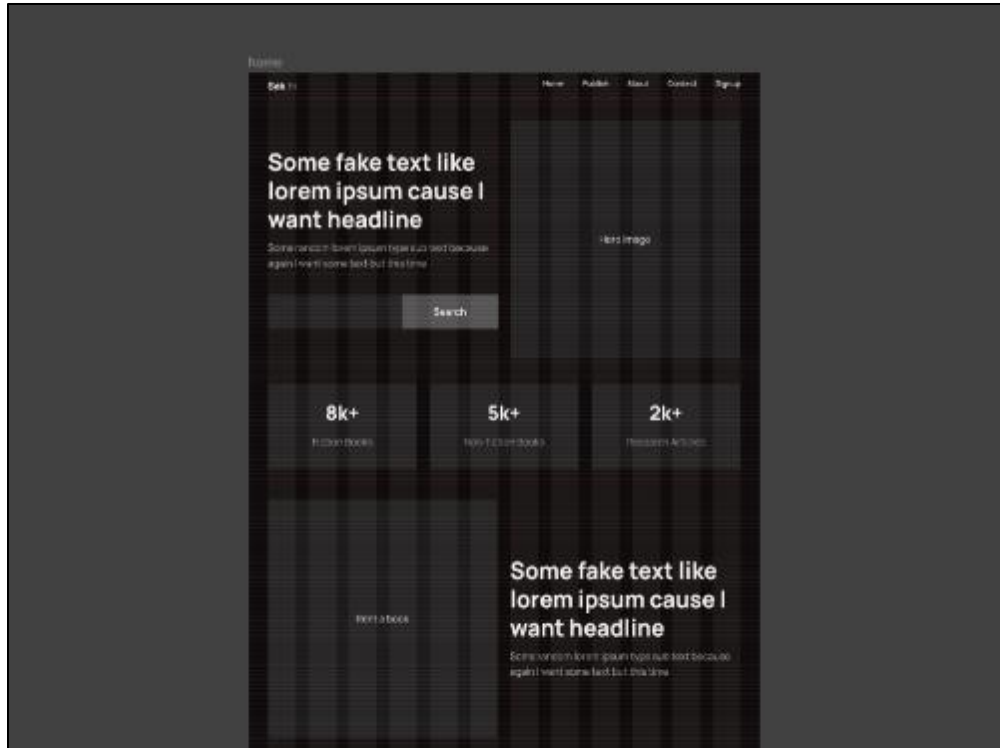

- 1.No clear CTA:** Websites lacked clarity of what is supposed to be done by the users.
- 2.Lack of Communication:** It almost felt like I was abandoned by the website to figure out what is supposed to be done because there was a strong lack of communication.
- 3.Visually Unappealing:** Most of the platforms appeared dull and lacked simple yet strong Visual language.

RESULT

CONCLUSION

- 1.Responsive Design (Designing for different break-points)
- 2.The call to action should be clear for users to know what is expected from them and what are the secondary options
- 3.Keeping the copy easy to understand
- 4.Power and use of Auto-layout, constraints, and resizing features in Figma
- 5.Efficient use of Text and Color Styles

Thank you for reading 🙌 If you liked my case study then **you can let me know by giving some claps** 🙌 (claps are good for confidence 🙌) or by commenting 💬

Also **do let me know if you didn't like anything** or if anything could be improved, or just **any general feedback for me is very much welcomed** 📧

You can connect with me on [Twitter](#), or [Linked-in](#), or can mail me at: **piyushux@gmail.com** for work-related opportunities. **Thank you :)**
